Hi Vinh Khang,

Congratulations on your **University of Waterloo President's Scholarship of Distinction**, valued at **\$2,000** in Year One, with the opportunity for two \$1,500 experience awards after first year.

Log in to [Quest](#) to view your scholarship offer and to review details and conditions. Look for the Entrance Awards tab beside the applicable program details.

The level of scholarship awarded is based on your admission average to the program to which you are admitted. Your admission average is calculated using your top 6 Grade 12 courses or equivalents, including each of the required courses for your program. If you've been admitted to more than one program at Waterloo, the scholarship awarded may be different. You will find [additional information about this scholarship](#) on our Undergraduate Admissions website.

To remain eligible for this scholarship, you must accept your Offer of Admission by 11:59 p.m. EDT on June 1, 2020 through the [Ontario Universities' Application Centre](#), and you must be enrolled at Waterloo in full-time degree studies for the entire fall 2020 term. You'll be able to use this entrance scholarship to help pay your tuition and fees. We'll send you an email in late July to explain how to do this.

If you have questions about the scholarship, please contact [Student Awards and Financial Aid](#). Please include your Waterloo ID # so we can serve you better.

Congratulations again!

Dear Vinh Khang,

One of the true joys of my work is the opportunity I get to come in contact with outstanding young people. It has been a pleasure to review your academic and personal development as presented in your scholarship application. The enthusiasm and dedication with which you pursue your many activities is a delight to see. Now, as you make plans for tertiary studies, I am happy that you have been accepted to the Faculty of Mathematics. We would be honoured to have you enroll at Waterloo.

In recognition of your outstanding academic record, we are pleased to offer you a Faculty of Mathematics Global Scholarship tenable upon enrollment in full-time study in the Faculty of Mathematics (excluding Software Engineering and Computing & Financial Management) at the University of Waterloo in September 2020.

The value of this scholarship is \$18,000, payable in installments of \$2250 in each of eight academic terms. Please note that all payments after your first year require that you maintain a cumulative average of at least 80% and that you complete five courses in each academic term. This scholarship still applies should your citizenship status change.

As well, the University of Waterloo offers President Scholarships to students with admission averages of 85% or greater. You can hold both your Global Scholarship and the President's Scholarship. However, you will not be eligible to hold both a Global Scholarship and a Faculty of Mathematics Entrance Scholarship.

In addition to the scholarship, you may have the opportunity of participating in the Faculty's Teaching Assistants program under which, from your 2A term on, you can assist the Faculty as a grader or tutor. This requires a three hour per week commitment from you in return for which you will receive a stipend. I hope that you will seriously consider being part of this program. Our experience is that students benefit tremendously from helping others. Please visit <https://uwaterloo.ca/math/current-undergraduates/teaching-assistant-ta-applications> for more information.

I am sure you are aware of the Faculty's strong undergraduate enrichment program in mathematics and computer science. Our Putnam training sessions enable students to gather in a club atmosphere and discuss problems. In addition, there is a very active International Collegiate Programming Contest (ICPC) preparation program with three teams usually placing at or near the top in the regional competition. Having a cohort of gifted students enables us to offer a section of the core courses at an advanced level. Students tell us that these advanced courses provide an excellent foundation for graduate studies.

If any questions about special classes or opportunities remain, I would be delighted to answer any questions by e-mail (troy.vasiga@uwaterloo.ca).

By accepting your offer of admission, you will automatically accept this scholarship. However, should you decide to decline this scholarship please inform me by email as soon as possible but no later than June 1st, 2020. This will enable the committee to make supplementary offers.

I do hope that you will accept the scholarship and I join my colleagues in saying that we look forward to having you as a student at Waterloo in the fall.

Yours very sincerely,

A handwritten signature in black ink that reads "Troy Vasiga". The signature is written in a cursive, flowing style.
